

## SORSIX TOGETHER WITH THE MINISTRY OF HEALTH OF NORTH MACEDONIA LAUNCHED THE INNOVATIVE "MOE ZDRAVJE" APPLICATION

[Skopje, 05.06.2023] – Sorsix, a leading healthtech company, is pleased to announce its collaboration with the Ministry of Health of North Macedonia with the launch of the groundbreaking mobile application “Moe Zdravje”. This innovative app is the first of its kind in the country, and aims to revolutionize healthcare delivery and empower citizens to take control of their health and well-being.

"Moe Zdravje" is a comprehensive health application designed to empower users to take control of their health journeys. With a user-friendly interface and a wealth of features, the app caters to the diverse needs of individuals seeking reliable health information and proactive health monitoring. The application itself is developed on the basis of the Pinga platform, a Sorsix product, allowing fully customizable, modular updates in the future and offering a holistic approach to encompass all potential elements of a total public health solution. The Pinga platform underpins the national EHR in North Macedonia, the “Moj Termin” system.

Key Features of the "Moe Zdravje" application include:

- **Personal Health Dashboard:** Users can conveniently track and manage their health data, including vital signs, medications, and medical history, all in one secure location.
- **Medical history:** The users of the application can access their complete medical history with a few taps.
- **Specialist appointment records and reports:** The app allows users to see past or upcoming appointments with healthcare providers. This feature also provides the user insights into past appointments with included diagnostic reports and laboratory results.
- **Electronic Prescription Management:** "Moe Zdravje" offers a convenient way to manage electronic prescriptions. Users can receive digital prescriptions directly on their smartphones, eliminating the need for paper documents and enabling easy access to prescription history.
- **Immunization records:** The app allows users to access their vaccination records, all in one place. Also, it showcases vaccination certificates, available for preview or download.

The collaboration between Sorsix and the Ministry of Health of North Macedonia highlights a shared commitment to leveraging technology for public health improvement. Through this partnership, Sorsix has worked closely with the Ministry to develop a user-centric application that aligns with the country's healthcare goals and priorities.

By adopting the "Moe Zdravje" app, the Ministry of Health aims to improve healthcare accessibility, enhance the patient experience, and promote proactive healthcare

management. The application reinforces the government's commitment to digital transformation and its dedication to providing quality healthcare services to all citizens.

Sorsix is proud to be part of this collaboration and to contribute its expertise in healthcare technology for the needs of the Macedonian healthcare sector. The company remains committed to its mission – solving human health through the support of Institutions and organizations in the endeavors to advance healthcare delivery and to achieve improved health outcomes for the citizens.

*"We are thrilled to introduce 'Moe Zdravje' to Macedonian citizens, empowering individuals to take charge of their health and well-being through innovative digital solutions," said **Dalibor Frtunik, CEO of Sorsix.** "We aim to bridge the gap between patients and healthcare providers, making healthcare more accessible, convenient, and patient-centered."*
